

## Praise Reports

Several months ago while at an office I had to get my blood drawn in addition to some other tests. The appointment should have taken about one hour tops. Well, the gal that tried to draw my blood ended up trying three times to the frustration of both of us! She decided to send me to a lab about a month later. In order to not have a repeat of this I used yelp in my area, found a lab where there were great reviews of a particular person. I prayed to get this person as I had no way of knowing how many people worked at this lab. I went in early and only one guy was there who checked me in. He did the blood draw and it was so well done and painless. One try. I asked him what his name was and sure enough, it was the same guy that got the great reviews! Thank you, Jesus for your mercy. PD

Several months back I asked RDM to pray about an upcoming skin biopsy. The skin area was very tender and the lesion did not look good to the doctor She ordered the biopsy and praise God, it was clear. Thank you so much for praying about this with me. RB

The Lord continues to “deliver me from the snare of the fowler”. At work my third quarter report came back as 98.4% accuracy. I got a good job review again and praising the Lord God for His goodness to me. MM

I'd been praying for my son. He told me the Lord spoke to his heart that seeds of doubt were choking out the good Word he has in his heart. Thanking Holy Spirit for speaking to my child. MM

At a prayer partners Zoom meeting a few months ago, everyone on our team prayed for my legs. I had fallen out of a chair in my office and had extreme nerve pain going on for about a week. I felt as though my legs were on fire. Very excruciating. After the team prayed within 24 hours all pain disappeared! Praise God for His goodness. Thank you RDM partners. PD

A young man, Jason, that I'd worked with was in a severe car accident. He and his wife are believers. He was driving and heard a repeating noise that indicated something was wrong with his car. He decided to pull over and stop on the right hand shoulder of the road. His wife was with him. He got out and had the hood open. His wife for reasons unknown decided to get out and walked towards the front of the vehicle between the car and guardrail. Jason was standing to the side of the car when a drunk driver plowed into him. A tow truck driver “just happened” to be following the drunk driver. The tow truck man called 911. Jason had several body parts broken: arms, legs, collarbone, collapsed lung, and a head trauma and one damaged leg which they thought may have to be amputated. He had to be hospitalized for several days just to be stabilized enough for surgery. He ended up with three surgeries at the time. He did not lose his leg but it was, instead, repaired. His other three surgeries were successful. He has a long rehabilitation ahead and a few more surgeries in his future. His wife was not injured. He expressed his deep thanks to all who prayed for him during this ordeal, and that included the RDM prayer team. Thank God for people that know how to reach the throne room. RB

I've been struggling with high eye pressures for the last several years. My left eye was particularly bad. I turned out to be very allergic to many of the prescription eye drops and in spite of three non-invasive surgeries on the left eye, my pressures were still not good. Many of the prayer team in RDM have been praying for me. Then, when I went in this past July, I was to let her know which surgery I chose. The choices were not good. However, God had another plan. To my utter amazement and joy, the eye surgeon told me my pressures were 18 in both eyes! This was a miracle for me! She also said I did not have to return for six months unless I noticed anything changing. Thank you to every partner who prayed and above all thanks to the Almighty One for answering those prayers. PD
